UNIVERSAL BEAM BRACKET BASEPLATE

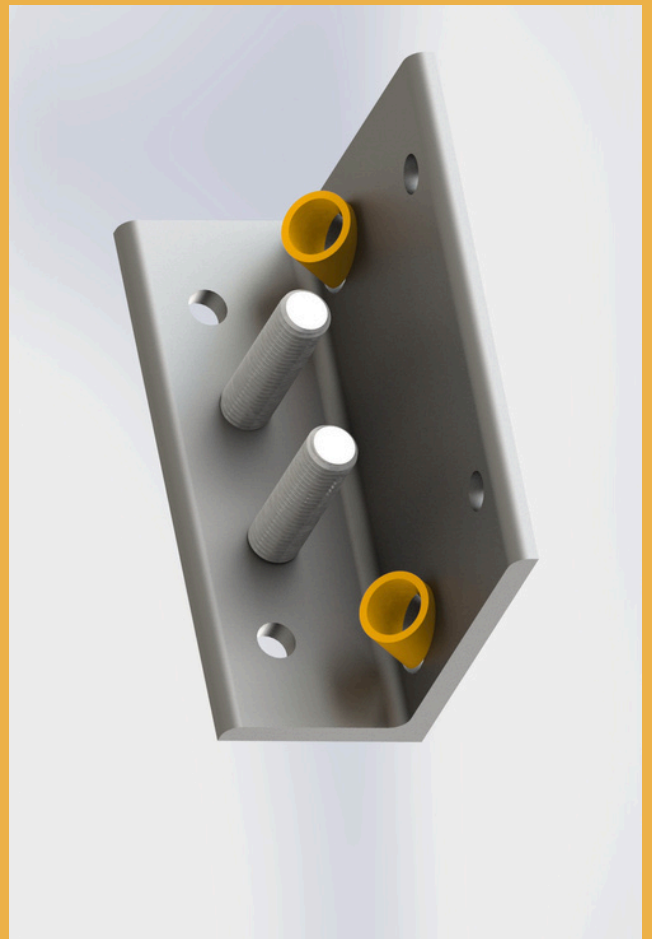

Engineered for Uncertain Slab
Conditions

**TIRED OF BASEPLATES THAT DON'T HOLD UP ON
THIN OR UNSTABLE BASEMENT SLABS?**

Our universal beam bracket baseplate is built to perform where others fall short — delivering strength, stability, and confidence no matter the conditions.

Ideal for:

- ✓ Renovations
- ✓ Structural Retrofits

TBR

ENGINEERING

WHY CHOOSE THIS BASEPLATE?

Versatile Fit

Compatible with a variety of basement floor types – including slabs under 3 inches or with unstable footing.

Maximum Stability

Provides strong, secure anchoring where traditional baseplates simply can't deliver.

Precision-Engineered

Includes complete 3D assemblies and part drawings for easy installation into your structural system.

TBR

ENGINEERING

Our universal beam bracket baseplate is built to perform where others fall short — delivering strength, stability, and confidence no matter the conditions.
